

# CURTIS G4 DOUBLE 1.0 GAL COFFEE BREWER

G4TP1T10A3100 ThermoPro

G4 Double 1.0 Stainless Steel

## WHY WE RECOMMEND THIS BREWER

Boasting a series of high-tech advancements designed to make serving coffee easier than ever, users can experience the next generation of brewing with the Curtis ThermoPro twin 2 gallon coffee brewer. In addition to reliable operation in a space-saving design with an integrated hot water faucet, this unit can brew between 15 and 21 gallons per hour. When paired with the appropriate dispenser (sold separately), the unit can hold up to 2 gallons of ready-to-serve coffee.
